

VERTEX HUTCH BOOKCASE – Assembly Instructions

Step 1

Use two people to lift the Vertex Hutch Bookcase into location on top of either one of the Vertex Credenzas or Filing Cabinet. We recommend the unit is placed against a wall for safety reasons.

Step 2

Attach one of the included 105mm x 20mm flat brackets to the back of the Vertex Hutch Bookcase with one of the supplied 16mm 4-gauge Philips head screws. Line the hole in one end of the bracket up with the pilot hole in the back of the Vertex Hutch Bookcase and with a PH2 screwdriver drive the screw in all the way and tighten. Ensure that the bracket is facing downwards.

Step 3

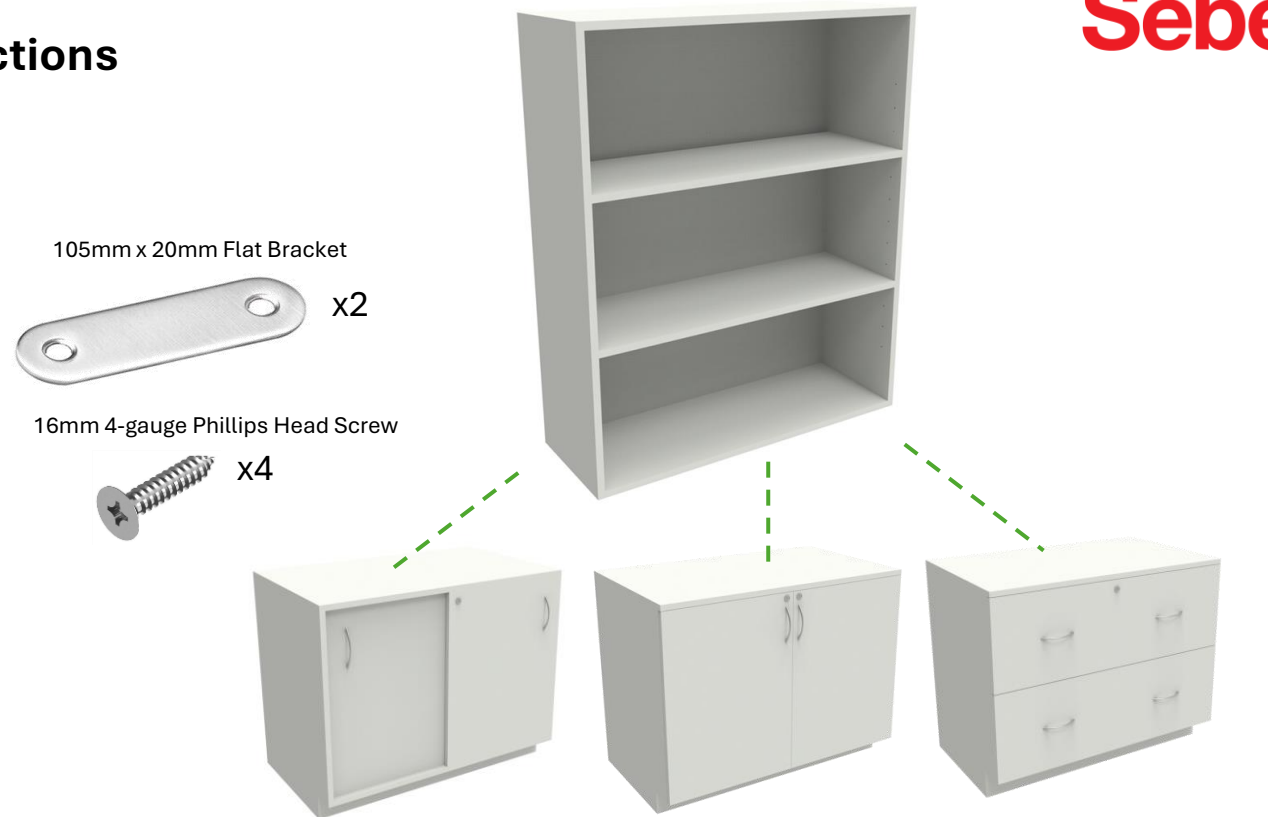

Using one of the supplied 16mm 4-gauge Philips head screws, place the screw through the hole in the other end of the 105mm x 20mm flat bracket and with a PH2 screwdriver drive the screw in all the way and tighten to secure the Vertex Hutch Bookcase to either one of the Vertex Credenzas or Filing Cabinet.

Step 4

Repeat steps 2 and 3 on the other side of the Vertex Bookcase using the other bracket and screws provided.

Step 5

We recommend you secure the Vertex Hutch Bookcase to the wall, refer to the instruction sticker on the reverse of the unit.

We recommend fixing this item to the wall.

You will need:

- Two x 85mm steel angle L brackets for each unit
- 15mm 8-gauge screws and 63mm 8-gauge screws
- A drill

Follow these steps:

- Mark the wall where the top of the furniture comes to, then move the furniture from the wall.
- Find the studs in the wall by tapping lightly and listening for the duller sound of the stud.
- Use 63mm 12-gauge screws to screw the brackets in place on the wall in line with your mark before moving the furniture back. To hide the brackets as much as possible, attach them as two upside Ls, with the bracket arm facing downwards against the wall.
- Screw the other arm of the bracket down onto the furniture with 15mm 8-gauge screws.
